

UCS Automation

Design, supply, installation, programming and commissioning of industrial control solutions

UCS Automation Ltd. offer a personal approach, one of partnership, whereby our team of engineers work closely with the client to ensure the best overall solution to a given project. UCS Automation offer a single source for the clients requirements, from small control panel manufacture to complete factory automation systems, both in the UK and overseas.

All control panels are manufactured to the very highest standards in our modern workshops. Our skilled workforce take great pride in ensuring all panels are built to the highest quality before being fully tested by our trained engineers.

- Project design - AutoCAD and AutoCAD Electrical
- Control panel manufacture
- Small machine manufacture
- Software design for PLCs, HMI and SCADA
- Electrical installation
- Energy saving projects
- Test and Inspection
- Commissioning
